

Dr Rhese

Monday Nov 28th

Recapitulation of Atmosphere, Light, Sound and Skin &c
also on the ligature, & Scar Puncturation, Leech, Cupping &c
On Cupping, glass cups the best. These calculations reduce the pulse,
the Animal Heat & tend to change the ^{mode} course of the blood &c
Topical bleeding best in old age and debilitated constitutions. Where
speedy relief is required, leech not to be used, but can be applied where cups
cannot be, also in children or where you do not wish a scar &c
When the disease is superficial we use the leech, the cups on Contra,
These to be applied in case of Inflammation whether from Spasm or relaxation.

Tuesday

The Cup and Leech very good resolvents but we must begin with these before
poultices or plasters after these Emollients. - Good in Glandular inflammation
In Hernia Humeralis, Swelled Testicle, Polymorus and Parapneumonia. Labia
Protrusa - In Ophthalmia behind the ear &c. In Angina, sore throat
not to be relied on in Group. Leeches are to be used in the above named
Disorders of other parts will perhaps be best treated by cups - Leech
though they be swallowed they are to be disengaged by Salt & Water & Ben
egar -

Cupping are to be employed in Phrenitis, Pleurisy, Pleitis, Angi-
na Pectoris, Inflammatory affection, Rheumatism especially if in the head -
Comatose affection, Epilepsy, Mania, Neuralgia, In Hemorrhages
to be preceded by general depletion -

The Lancet

Friday

General bleeding may be done by the Spring or thumb
lancet, if you wish much blood in a short time, make the incision
transversely - The lancet perfectly clean and sharp, a ligature rarely
necessary in bleeding of the foot - Blood best abstracted from
a vein or if necessary the temporal artery if the bleeding will not
stop, cut the artery entirely across - the Jugular Vein may also
be punctured after making pressure below at the point intend-
ed to be opened, bleed where may be thought best whether in
the arm or foot - In Suppression Menstruation sometimes the foot
best &c - The blood sometimes collect in the cellular tissues
and require a little pressure or the application of ~~Cold~~ Cold Water
or ~~Lead~~ water - always name your disease to persons out of the
profession.

Monday Dec 5th

External & other circumstances as climate &c to be considered in blood-
letting, some do not bleed in fevers of hot climate - blood letting is more
required in cold, dry weather as winter &c than in summer or heat.

Affections of the nerves sometimes require blood-letting And it raises
the pulse in Dysentery, not completely ^{relief} by it in Tic Dolorous, better
in Palsy, in balance of the bladder, in Tetanus to be carried to a great extent.
When hemorrhoid is required known by the tongue of red edges, blue,
yellow or red brown middle, the hard and tumid abdomen, where
distances are immediately repeated after swallowing is sometimes overcome
by the lancet, but best by the Torniquet — inactivity of the bowels ~~also~~
also require ^{bleeding} sometimes frequent bleeding the very best — but sometimes it comes
on gradually, and here it requires Tonics — but the happens suddenly.
Good when you have bloody faeces — very injurious in the advanced
stage of Dysentery — Good when urine streaked with blood —
Good in some cases of Serapsy — Where the eyes swollen and cheeks &c
unequal temperature of the surface demand bleeding — affection of
the lungs &c The pulse to be carefully examined before a determina-
tion is made to bleed if hard, full, tense &c demand blood-letting if it be
in mania — intermittent pulse requires blood-letting —

Tuesday Dec 6th

On water, a Therapeutic remedy, to be applied by aspersion, ablution, &c
by a sponge to be used at the first visit and after this the other medi-
cines will have their effects more evident — Ice to the head very good
in fever also give cold water as a drink — it may be employed by effu-
sion or affusion when there is a recession from the surface to some other part —
also when there is coldness by suppressed perspiration, in many nervous diseases.
in Tetanus, ^(in Hysterical) generally do good also ^{when} ^{the} ^{commenced} ^{time} ^{of} ^{the} ^{disease}
Immersion or bath good as before, as well as for the convalescence —
Thursday Dec 8th

Rubefacients And Epispastics calculated to excite a particular part of
the body and produce a discharge of liquid or pus by causing an increase
in the particular part — of Rubefacientia — calculated to diminish
the pain — to diminish blood and action — as Hemorrhoids, tooth ache —
They are sudden in their effect to any chronic habit — of Rubefacientia to
phlegmatic habits — Of Epispastica to evacuate serous fluids deep seated
the chronic habits — Of the Epispastic Rubefacientia belong to the
class of stimulants capable of exciting redness — The first is dry friction
by cloth or hand, useful in fainting — Rheumatic joints by flannel, palsy
of the extremities by a flesh brush, Cold stage of Intermittents, pain and flatulency
of the stomach —

2nd Is Burgundy pitch is of the least important, also of Myrrh —

Mustard very useful in Sinapisms, being prompt, useful in cases as gout &c
where pain is necessary beginning to draw in 15 or 20 minutes, ~~the~~ symptoms of
reduced action, in prostrated states of the system — May be applied by
mixing as a poultice with vinegar, bread and milk or rye meal or
infused in alcohol ^{very much used} — in basilicon ointment

In febrile diseases apply to the Sides of the feet or Ancles, if in diseases of head back of the neck —

The Red pepper — in cold feet — gout and the same as Mustard &c
Garlic very useful in diseases of the chest of children — same as before &c
all tincture are Rubefacients, Oils, Resins, —

Vesicatory as Opodilaoe & British Oil —

Opodilaoe			British Oil		
Alcohol	℥ viij	dissolve the soap in alcohol and add the other ingredients pour off the pure	Oil Turpentine	℥ viij	
White Soap	℥ xx		Oil Linseed	℥ viij	
Water Ammonia	℥ iv		Amber	℥ iv	
Camphor	℥ viij		Hard Oil of Sassafras	℥ iv	
Oil Rosemary	℥ i		Balaadoc Tar	℥ iij or ℥ iij	
			American Tar	℥ iv or ℥ i	

Of Vesicatory, causing sores containing Alum, as Mebeous Vesicatory or Flies
or Cantharides in decoction, Tincture and plaster as ℥ iij in a pint of water applied
by cloths rung out in it with Oil Turpentine with equal parts of Cantharides —
Tincture ℥ i to a lb of water — No more & plaster take Mutton suet —
White wax and Resin & Cantharides of equal parts

Blisters. of the size, situation to be applied, time to remain on — Keeping them
in their situation — the shape — The manner of dressing — " — &c &c &c
— Monday Dec 12th —

The effects of Cantharides sometimes very painful and irritated system must
bleed before applying a Cantharides blister — gangrene results in very critical
state of the system or vital exhaustion — inflammation when left on too long
constitutional decay or perian stranguary likely to result also from burns, by the extend
ed specific action of sympathy or absorption — to prevent stranguary give
Camphor and Opium before it is complained of — (in ¼ gr Opium, grs Camphor
frequently repeated — or diluent drinks with a few drops of Laudanum —
good in — as depletory, ^{evacuative} stimulatory, (of drawing the superfluous part of the blood in
the depletory) inducing indirect debility; Antiphlogistic measure — good in
in all cases where cupping, bleeding, cold application are useful also in
chronic diseases — very good in Erysipelas — Dropsy, inflamed veins,
to check gangrene —

Tuesday Dec 13th
Litta Vitata or Potatoes fly a vesicary or blistering application &c

Thursday Dec 15th
Of Emetics — " induced by Mechanical as tickling the fauces,
distending the stomach by water and Mustard — by Chemically as
Fast Emetic &c — The effects produced on the nerves — the se-
cretory vessels also Mucous Membrane & Cutaneous Tissue, the stomach
warm when the skin is cold and the Contra — Effects on the
liver — On the Pulmonary system increasing breathing and the
pulse — the Uterus as abortion — The absorption system &c

Friday Dec 19th

In vomiting, the stomach generally contracts on its contents aided by the muscles of the abdomen and diaphragm but sometimes does not as in Yellow fever - In the nervous system it does not act beneficially primarily but secondarily - the same in disease of the brain -

On the blood vessels, after Emetics, the pulse sinks - cautious in Gout -

Vegetable
Ipecacuanha of South America - the root - after adulterated, Bellisera Ipec
of the Brown, Grey & White - Emetin contained by Ipecac is the active parts being 14 to 100 parts
3) Macerated in Ether ^{strongly Alcohol} saturated, evaporated filtered and dried to procure Emetin - of Oxygen
Hydrogen & Carbon

Monday Dec 20th

Pure Emetin is white, changes blue acids - it is indicated in all cases when Ipecac is indicated - Emetin gr v ^{or Symp of Squills} Inf Orange Flour z ii , Dose z iv Spoonfull every 3 hours - Lozenges expectorant Emetin gr 32 White Sugar z iv divided in 9 Lozenges - For vomiting Emetin gr 32 Sugar z ii divided 18 Lozenges one of which will make a child vomit - 3 or 4 for an Adult -

Pure Emetin gr viij Sugar z iv divided into 8 - " - Garlic will neutralize it in the stomach -

Ipecac in Pulv - water infusion - Wine Inf - In powder Dose z jt to 30 grs
Sometimes very good as a cathartic by giving 30 grs with Laudanum -
To be kept in close vessels best given with pulv Gum Arabic, never give it with sweet meats no fluid drinks until it begins to vomit - to children give it with milk - Inf of Wine half a pint Ipecac z i or the tea of Ipecac - Root Prune z ii White Wine lb ij digest 10 days Dose z i adult or with Coar, Home Symp - Blue ^{map} grs XXIV Ipecac grs XII

Opium gr ij divided pill XII one pill every four hours the very best for the mucous tubes does as powder -

Ipecac z i Opium z i Cast Potash z iv ^{China}

Gilenia Trepaliata or American Ipecac - Bark Root - Dose 30 grs as an Emetic for intermittent fever - to be collected in September -

Gilenia Stipularis the same as the above the Root Biennial - may make transplanting -

Euphorbia Ipecac - Root, dug up at any time, nearly as good as Ipecac as it is not unpleasant occasionally cathartic and contains Emetin -

Thursaday Dec 22nd
Robelia Inflata root as an Antispasmodic for Croup (Indian Turnips) in large doses act as an emetic & narcotic - given in decoction a hand full to 3 measures of

Infusion z i to a pint - Dose from 5 to 20 grs (asthma)

^{or nicotiana}
Tobacco Dose from 5 to 20 grs in pulv as an Antispasmodic Tinct z ij to a pint - also in infusion - The Oil very powerful, Tobacco powerful sedative - When applied to the stomach produce vomiting, by injection it produces great relaxation of the muscles - Emmetic as Olegetalis, Infusion in emphysematous inflammation, an unsafe measure, in injection not more than z ss in infusion

Dr. Rhcese

Friday Dec 23rd

Of Specacuanha the best of all the vegetable Emetic and its active principles easily separated which is Emotin - it acts as an Antispasmodic, and is useful - for the Mucous Membrane Speec - for the Muscular the Trifoliata &c -

Of the Mineral Emetic - And first Antimony, a black, hard, brittle substance separated from its impurities by ^{by precipitation} infusion - Contains a portion of Sulphur, regular of Antimony also -

Tuesday Dec 27th

Those of light complexion more liable to Ophthalmia and Antimony useful - Flavour of antimony by evaporation - said sometimes to be good - Glasp of Ant - for making Emetic wine - Golden Sulp - Antimony, the settling after acid Nitric - An Emetic or Cathartic -

Emetic Wine - Tartar

marshal regular of Antimony -

The precipitated Sulphuret of Antimony - Solution Potash & Water, boil Antimony Oij - Boiled for 3 hours strained and diluted sulph acid to precipitate and wash - is insoluble in water - said to be good in cutaneous diseases of Syphilitic kind - Calomel Ant-dup aa ʒij
rub Gum Guaiac ʒiv Calile ʒoat ʒij Acid: 3 grs each two morning and evening

if acid in the stomach may vomit -

Burnes Mineral - Sulp - Ant - Carb Potash aa ʒi m and melt and powder - and boil in water when cool add about Sulp acid, and dry it is a Hypos Sulphuret of Antimony with an excess of Sulphur - of a red powder - liable to a dulcoration with chalk &c - good as Scaphiorat ʒss 1/2 bathartic ʒss - Emetic ʒss to ʒv &c -

Tart Emetic
Antimonium Tartarizatum to for Nitro mitte ʒss ʒij Crist Fort ʒij
water kept in a glass ʒij filter boil and filter - Crystals thrown on the fire become black - dissolved in water - incompatible with mineral acids - alkalies Bitters &c - Antidote infusion of Galles - not decomposed by Gentian or Worm Wood - frequently diluted should be purchased in crystals - the best Emetic -

Thursday Dec 29th

Tartar Emetic Dose 6 to 10 grs for an adult not a full dose at once
in life in the case of Poison, first Emetic. 10 grs induce life action than
4 grs. It is not a sedative - as bathastie, & Diaphoretic -

Antimonial Wine, - Tart. Ant- $\mathfrak{z}\mathfrak{j}$ water $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ wine $\mathfrak{z}\mathfrak{v}\mathfrak{i}\mathfrak{j}$ - $\mathfrak{z}\mathfrak{i}$ (4 grs)
Glass of Antimony - One ounce contain 2 or 4 grs for children, for
children a tea-spoonful -

Tartar Emetic good - act on the whole alimentary canal as strongly
as on the stomach $\mathfrak{z}\mathfrak{i}$ Tart. Ant $\mathfrak{z}\mathfrak{ss}\mathfrak{i}\mathfrak{j}$ water $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ for
a purge - is obstinate Cathartic - but good in intestinal inflamma-
tions - Said to prostrate the heart and arteries but this is not the case
it is sedative secondarily - It is preferable for Spasm - various
effects in different epidemics - good in Tetanus being easily given
If it does no good it is pernicious by prostration -

Sulph-Cupri, by evaporating mineral waters containing it, & a
Sulphat - 1 part per $\mathfrak{A}\mathfrak{x}$ - 2 acid 10 water - Insoluble in Alcohol &
soluble in 4 parts water - Incompatible, Alkalies, Minnate lime,
acetate of Lead &c Metallic substances, of Copper does not dele-
terious - Nitrate of Potash and Specac with myph

Sulph-Zinc Zinc $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ Sulph-acid $\mathfrak{z}\mathfrak{v}$ water $\mathfrak{z}\mathfrak{x}\mathfrak{x}$ - never pure as
it contains Iron - Soluble 2 part water, 1 warm water, in al-
cohol -

Specac, Oxy mel of Squills &c as an expectorant

Tart Ant- Calomel with Opium used instead of James powder

Monday Janry 2^d 1826
Of Cathartics, — Purgation may take place without increasing the
peristaltic motion of the bowels —
and this is not always purging when the peristaltic motion is
increased —
Cathartics, stimulate the exhalents, ^{saline} — not confined to the parts applied
stimulate the bile, some to the lower part ^{of the bowels} as Aloes purg
much on the rectum —

Injections; answers many important purposes, Warm Water, Oil
a table spoonful of Salt ^{Polypus} Warm Water — Turpentine warm ℥j, &c
Senna 1 pound Oil ℥j Sulp Magn ℥j — for Spasm only as it is very
powerful — quantity owing to circumstances, at least a pint —
best in extreme irritability of the Stomach, may sustain life
when fluids cannot be swallowed — may induce prolopus
Anti-irritation &c —

Tuesday Janry 3^d 1826

vegetable cathartics —

Linum Catharticum, bitter taste, no odour — extract of plants ℥j to ℥j

Rhamnus Catharticum, ^{or Buckthorn berries} the berries are employed, containing four seeds; dose 15. 20
or ℥j to ℥ij — Syrup — Juice 1 part Sugar 2 parts — dose table spoonfull

Hellebore; of the black; — the fibres of the root, ^{used} externally black internally
white — volatile acid — fatty resin water volatile acid
&c — Water and alcohol extracts — dose gr X ℥j — Decotion

℥ij to a pint of Water — Tinct Hellebore ℥iv. Succineal ℥p
Alcohol lbij a teaspoonful or table spoonful — the very best altera-
tive — 4th Helleb Myrrh aa ℥j Cardamon Seed ℥ij divide

in pill 1 gr each — 4th Helleb ℥p Bolus milk ℥vj
let it infuse 10 or 12 hours to be taken twice — Hellebore ℥j
Water 1v ℥j Dose a Spoonful every other day — 4th Helleb ℥j Cream

Tart ℥j &c Formula — to produce Menstrual flow &c
Podopellum ^{pellatum} May-apple, with lemon &c Fruit something
like a lemon containing seed — of our own Country fruit mature
in September and the proper time to collect them

Water and proof Spirit extract - Slow gr & 2j in substance
more slow in operation than jalap combine it with Calomel -

Inf. of May-apple root 3j 1/2 pint decoct of Senna with Cardamon
seed strain add Molasses but not so palatable -

Convolvulus Parandatus - ^{thus say Jan 5th 1820} or wild potatoe, Root 3j

and for gravel - by Empiric
Spigelia Marylandica ^{Marylandica} - ^{Carolina} Indian Pink Root - Water the common
mixture - there are no anthelmintics Vermifuge act
mechanically - Olean Tuberculin as a Vermifuge - Mucous &c

Spigelia a narcotic and Cathartic and by this act as an anthelmintic
something like stramonium in effects, something

Very Good for Worm fever of the Mucous Membrane of the Alim. Canal
Age diminishes the effect - Pulv. Root in dose ʒj to ʒij - in smaller
doses good - Infusion Root ʒj or leaves ʒij to a pint of water
Dose 2 or 3 ʒ - Tea. Spig. ʒj Senna ^{leaves} *Maria* ʒij Savin ʒj
in a quart of Boiling water & sweetened - " - "

Cassia Marylandica - or American Senna - near water found -
much Cathartic little inferior to Senna of the tropics -

Cassia Senna, consist of Resin Mucilage, purgative and bitter
principle - Alcohol and water Ext. Alcohol extract nearly
all the properties, the purgative in Resin Oc - Infusion kept in
covered vessels - Dose ʒj - Infus - Senna ʒij Ginger ʒj
Boiling water ʒvi - Dose ʒj to ʒij assisted by strong acids,

Tart. Infus - Senna ʒij Coriander seed ʒj Custard Tart ʒij
distilled water ʒij - or Infus Senna Boiling water ʒvi
Senna ʒj Lemon peel juice aa ʒij in divided dose -
Senna ʒij Cream Tart ʒij Rubial ʒj
Coriander ʒij Manna ʒj Boiling water ʒvi

Sassafras 3i Senna 3i ^{Dr Rheese} Coriand: 3ss Sugar 3ss Boiling
 water 3viij &c in
 Tinct of Senna or Cassia Compound or Elixir of Health — "
 Senna 3ij Jalap Root 3i Coriand: 3ss Oil Alcohol lbsiijf dec
 at 7 day add Sugar 3iv. Dose 3i to 3ij — Electuary also
 Senna 3iv ^{prunes} pulp from lbj Tamarind 3v molass lbjss
 Pulvis Sennae Compositus; — Senna Cristals Tart 3ij
 Camomile 3ss Ginger 3ij Dose 3ij to 3i &c —
 Monday Janry 9th 1826

Jalap, — the root will burn in a candle — proof spirits its
 menstruum. Resin contains the active principle
^{Sapo Jalapensis}
 Extract. Jalap lbj Alcohol lbss boil in water and evaporate — Dose
 gr x or xij grs — It is a stimulating cathartic Sapo Jalapensis

Root Jal: 3ij — Alcohol 3xv — Root in powder the
 best in grs xv to 3ss — Compound Extr. 1 part Jal: 2 Super Tart. Potash
 to be triturated — very powerful purge is Jalap x gr Specac gr iij
Convolvulus Scamony — Root about 4 feet long & affords
 the scammony of the shops from the juice of the root being exposed
 becomes hard — two sorts in the shops the one of Aleppo the best
 if good you will have a milky appearance from wetting
 proof spirits its menstruum; Dose gr iij to xv with Liqueurice &c
 Electuary Scam 3ss Cloves ginger 3v Caraway Oil 3ss
 Oil of Rose 9ss Dose 3ss — Compound Scamony. Jalap 3ij
 ginger 3ss in — ~~helps Scamony~~ & Alocs, Colic with
 Scammony. Jalap &c form the pills of the shops &c —

Tuesday Janry-10th

Scamony should be used notwithstanding what has been said.

Colicynth and articles long in use, not used — pulp part no odour to be given with other articles. Decoct and Infusion are easily made

Ext — ^{leaves gr vi to 3ss}
Colicynth lbj pulp-water 1 gallon boil to 1 pint filter and evaporate

Ext Colicynth 3ij Jalap 3j Ammon soap 3ss Guaacum 3ij

Tartary Antimony gr viij Sanche Casary 4 gtt Rou massy Syrup of Buckthorn q. s. Divia 64 pills

Comp Extract of Coli pulp 3vj Succ. aloes 3ij Scam. 3ss

Card: Seed 3j proof spirit lbj; ^{leaves gr x to xv} The old prescription of the Londou Dis. Colocynth 3vj Aloes 3ij Scam. 3ss

Card: 3j Castile Soap 3ij Warm water lbj. ^{leaves gr vi to 3ss}

With Calomel very good — Comp Ext Coli 3j Calom gr xv

Tart Ant gr j Oil Corraury q. s. Divia 24 pills 12 or 3 every night — Ext Col batholicon aloes 3j Ext High Col 3ij

Colli: 3j Resin Jalap Scam. 3ss — ^{leaves gr xij to xv}

Juglans Coccyrea, or White Walnut, Butter nut, inner bark of the root also spispastic Ext — ^{leaves gr x to xv or xx} — Di. 3ss. to be collected in June — good with Calomel in Bilious Cases —

Thursday Janry 12th

Elaterium. or wild cucumber or squirting cucumber, the root only to be used and ^{around the seed} juice is the active part, taste bitter, is inflammable ^{leaves gr ij to j} — Elatin often adulterated, affected by the Season and action with the bitter principle — the sidament of the juice to be spread on cloths — ^{leaves 1/2 gr or 1 gr to ij} — one of the best Cathar tic to be watched — Sub Elaterium gr ij Senice Consine of Roses Divia in 8 pills one every two hours — Gentian Ext for senice Ela gr xv Cal. Squell gr viij gum Arab 3j divid 8 powder one every morning for dropy — for ag and locks

for a draught rub with G. Arabic -

Olive Oil - for sweet oil - a good Cathartic for chil-
dren - Aloe Zij - enters in Enemata - Antidote for worms
collected from June to August
Friday January 13th

Gambogia or Gamboge - from the wood and root of the tree -
from incisions made in the bark and a white juice comes out which
becomes hard - Gum 1 part - Resin - Alcohol dissolves 9/10
Aloe 2 to 6 grs - Gum gr x bal: grs Soap q. t. Divid y
do not drink for tepid drinks or vomiting may follow - is safe

Spiced Rhubarb ʒi lein: ʒij nutmeg & de

dose ʒʒ to ʒʒ - " - the colouring matter only seen in the
urine - as a Tonic to be given in small doses - " -

Manna - the unspiced juice of the ash tree - 2 kinds
the coarsete juice is what is used by us - promotes the operation
of other Cathartics -

Oil Lilium or Croton Oil - the root is a purge in ʒssij - purga
tive gttʒ to 1 drop - good in habitual costiveness - also the colouring
Formula, Oil gttʒ Conf Rou ʒssij Maida in a pill - ʒʒ Tinct to equal
to a drop and a half of the oil

Thursday Jan 19th

Ol. Ricini — dose an \mathfrak{z} or $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ very good — Make formula

Castor Oil $\mathfrak{z}\mathfrak{i}$ Rub \mathfrak{q} Arab. $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ Sugar $\mathfrak{z}\mathfrak{i}$

Laud: 40 gts Mint water $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ ~~distilling~~ — Oil Cast. $\mathfrak{z}\mathfrak{i}$
Sug: $\mathfrak{z}\mathfrak{i}$ \mathfrak{q} Arab q.s. add Lime water $\mathfrak{z}\mathfrak{v}$ Laud: gtt 20

Cast Oil $\mathfrak{z}\mathfrak{i}$ Sugar, Mint water &c a teaspoonful for
a child an year of age ^{for Cholera infantum} — For Drunkards add
Shit Turpentine $\mathfrak{z}\mathfrak{j}$ or \mathfrak{q} Cast. Oil $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ Turpent. $\mathfrak{z}\mathfrak{j}$
Camphor $\mathfrak{z}\mathfrak{i}$ Laudn: $\mathfrak{z}\mathfrak{j}$ Gum Arab $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ Mint
water $\mathfrak{z}\mathfrak{v}$ a tablespoonful every half an hour.

Mineral Purgatives

Sulphur — The more yellow the better — Washed in water
and cleared of Sulp: acid is called sub: sulphur —

Dose from $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ to $\mathfrak{z}\mathfrak{i}\mathfrak{v}$ but does not act alone but with
Magnesia or Cream Tart: Sulp: $\mathfrak{z}\mathfrak{i}\mathfrak{i}$ Mag: $\mathfrak{z}\mathfrak{i}$
 \mathfrak{q} . Arab $\mathfrak{z}\mathfrak{j}$ Milk \mathfrak{q} s add Sugar dose a tablespoonful

Sulp: Cream Tart $\mathfrak{a}\mathfrak{i}\mathfrak{a}$ $\mathfrak{z}\mathfrak{i}$ Mint water $\mathfrak{z}\mathfrak{i}\mathfrak{v}$
these are laxatives — Said to be good in dysentery

Friday Jan 20th

Magnesia — from Carb. Magn: calcined Dose $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ — in Soda
water or milk — Correcting acidity — Calcined best alone — for
Cal M gr 30 Rhubarb gr vii Sug: $\mathfrak{z}\mathfrak{i}$ Al
Auni: gtt 3 Laud gtt 4 Water $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ dose a teaspoonful

Sulp: Potash Carb Mag: be boiled strained for Calcium Mag:
incompatible Acids, Sulp Zinc Copper &c adulterated with Chalk
Dose \mathfrak{zj} to $\text{an}\mathfrak{zj}$ \mathfrak{ss} of the Carb — ^{to act with Chalk and Sulp acid and a precipitate} — May be pumped in water
as Epsom Mag: and Soda Water — An Antidote for Arsenic not so

Epsom Salt Dose $\text{an}\mathfrak{zj}$ — Lime Muriat &c incompatible

Sulp Soda the principal of sea Salt, dose \mathfrak{zj} Purgatives are now
closed properly speaking &c

Monday Jan 23rd 1826

Sulp: Potash Antroated Tartar dose \mathfrak{zj} — Water \mathfrak{zj} dissolves
20 or 30 grs — entirely decomposed of Lime — made of Iron, the
strong affinity to Sulp Acid and decomposed by it — Component
of Aloes preparation — not soluble in Alcohol

Tartrate Potash — Carb: \mathfrak{llj} Sulp Tart \mathfrak{llij} Boiling
water \mathfrak{llxv} — cool evap strain evaporate — dissolved in 4 parts water
in crystals equal part — decomp: Lime, acids Tamarinds &c
dose \mathfrak{zj} \mathfrak{ss} for diuretic \mathfrak{zij} or 4 —

Sulp Tart Potash — crystals of Tartar — or Cream Tartar — slightly
soluble in water — alum increases also Boracic acid, its solubility
adulterated — in Jalap & Senega compound — dose \mathfrak{zj} to 4, smaller
for diuretic — good for febrile patient — good with flaxseed
tea — with Gamboge &c \mathfrak{R} Cream Tart \mathfrak{zj} Sulp Pot \mathfrak{zj}
squills \mathfrak{zij} Tart Ant: $\text{gr}\mathfrak{ij}$ — dose four five Spoonful daily for adults
the smaller the water the more effectual the purge

Salt of Potash & Soda — ^{Rockelle} Calc: 320 lbs Tart Soda 12
Water lbs 10 — filter evaporate — Soluble in water
in 5 parts — dose 3ij ^{more agreeable than Epsom salts}

Acetate of Potash — in masses very deliquescent — 3 Water 60 — dissolve 104
parts — Soluble in 4 parts Alcohol — decomposed by Tamarinds & acids &c
dose 3ij — Not to be prescribed in powder or pills, most agreeable
than all salts — obtained from Calcined bones forming lime &c
to be given in Broths &c —

Sciacety Powder — 35 gr Tart Acid — ~~White~~ paper — And white
25 gr Tart Acid — Blue paper 30 gr Carb Soda 3ij Tart Rochel
to be taken immediately — it is the ~~best~~ best of all mentioned
for fever called irritants or febrifuge

Tuesday Jan'y 2^d

Mercury

How differs from Tart. Emetic?

Calomel — Cristaline light alters the colour — decomposed by Alka-
lies & lime water, Iron, Copper & lead &c. Some an Emetic — Anti-
- Emetic in small doses very good Cholera Infantum in Cal: gr ij
of Arab 3j Ol: ~~Amia~~ Annisi qts 4 Divid: in 4 powders — Good
in Chronic Diarrhea —

To Pulmonary organs it very useful with Tart. Emetic & Ipecac
to the pulse some say it is increased & other diminishes

Nerves & Brain — in Neuralgia

Viscera as liver

Intestinal Canal — dose + to XV grs 30 grs not so good an effect

Dr Phease

Thursday Janry 26th 1826

Calomel called for in the stomach in the following forms
Red Oxide of quicksilver — of a red sparkling colour — is heat ap-
plied to Mercury in a sand bath in a glass bottle, dose
1gr — good in

Turpeth Mineral — formerly an Emetic, said to be good in Syphilis
Subsulp: of Mercury — Make as follows: purif: Quick. Z^{iv} Sulp. Acid Z^{vii}
Water boiled in a glass vessel and sand bath — will be a yellow
powder — dose ^{2 or 3 hurg.} gr^v or 1gr to be added to other article
good when added to head ache snuff —

As an Alterative

Ethiops Mineral — dose gr^v to 3gr — 1 part Sulp. 1 Mercury —
insoluble in Sulp. Acid not of much use —

Red Sulp: of Mercury — insoluble in water & is a dry Sulp: 1 Sulp. 2 Mer.
Mercurium — 3gr thrown on a red hot iron will salivate.
said to be good in Ulcerated sore throat —

add R^y pur Quick Z^{iv} Sublulp Z^{viii} to be put to the fire then
quick silver the vessel to the covered —
~~sub it in powder~~

White Precipitate — Ox. g. Mer Mer Ulp Mer Amr. Z^{iv} Sol:
Sub Carb. Potash Ulp — Insoluble in water & Alcohol — used
for the external surface —

Red Precipitate — employed internally for Syphilis & venereal disease to 3gr
Hard: Oxid mercur — pu Mer Ulp Nit Acid Ulp, —
heat a splined sub — sometimes adul: with red lead detect
by Nit. Acid — good in Herpetic eruption — Oint R P 1 pa
to 8 part of Lard —

Mercurial Ointment - for the skin purges, Salivates of 2 kind
being Quick liij Lead 3℥3 Suet 3℥ij Rub down together
this is better than Quicksilver alone or Ol Lin. 3℥
add tallow Suet with Quicksilver - Oil of Eggs, Ol. of Turpentine
to facilitate the making the Ointment -
Friday Janry 27th 1826

Corrosive Sublimate - At purif. Quick: liij Sulph Acid liijss Mur
soda ℥iv Boil in a glas. vessel - Triturate, sublime &c
Soluble 11 parts Cold & 3 parts Warm Water - Soluble in a solution
Muriate of Amm. - Muriatic acid &c Dose 1/8 gr 1/2 gr &c
in Symp. - Tars liij ^{Boiled} Lin. Huic aa 3℥ Honey liij Cor. Sub. 3℥6 gr ^{second wipe glass}
Solution Oximuriate of Mercury, R. Ox. Mur viij grs Rectif. Spirit
water 3℥ij for Phag. ^{admir. ulcers} add it with
Carbonates - Lime water, incompatible
for Nitrate of Silver Iron &c also Tart Antimony but
they form good alterative drops -
Dose 3℥ - Antidote White of Eggs, Milk &c -
Monday Janry 30th 1826

If Corrosive Sublimate is adulterated ^{with other substances} - Lime water produces
an orange colour - Galvanic ~~experiment~~ shows the Mercury
in a metallic state -

The Salivation from Mercury if ~~prolonged~~ ^{prolonged} does injury - during
this it is well to ~~allow him~~ ^{allow him} not necessary always to
deplete by abstinence - for salivation it is necessary not allow
to be too cautious -

Ulex maritima - sea onion - the root not to be too much
ad. loses 4/5 its weight - produces ulcer
Jam 6 Tann 24 Sugar 6. Bitter ^{herb} pure 35 Woody fiber 30 -
Water & alcohol receive it - not affected by Veg. Acid

Wp: 1 quart of wine & spirit of the macerated in glass
bottle 24 hour 3i 3k - Syr. Honey lbij Sug. lbij

good for a cough &

Thursday Feb 2nd 1826

Garlic - Root is round - Water Infusion extracts, decoction & expressed
Sulphur may be discovered - Given to children, & Garlic one root
Fennel Seed $\mathfrak{z}\mathfrak{j}$ - Horse radish a tea Spoonful, simmer over
a fire in half a pint of vinegar, to a Syrup, Dose a Spoonful
as an expectorant - for Lymphatics &c Is an an squallity &
like squil - Dose 3 or 4 gr in pill alone or in combination
as a Diuretic of the Urine Root - similar to this is the

Colchicum Autumnale

Root Aug
for in the beginning of summer cut in transverse slices and dried
active principle is in the Milk - containing starch gum - extractive
matter - scarcely soluble in water - but ether and more so alcohol
dissolves it - ~~Dose 4 gr for Britum~~ Dose $\frac{1}{8}$ to $\frac{1}{4}$ gr this is the
active principle -

The Colchicum Autumn. produces one or two alvine discharges &
acts on the kidneys -

Urine Inf - Col: Aut: $\mathfrak{li}\mathfrak{j}$ Cher Wine $\mathfrak{z}\mathfrak{x}\mathfrak{i}$ infused 10 days & filtered
dose $\mathfrak{z}\mathfrak{j}$ to $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ - Much the same as the C: Medicinale

The C: Medicinale comes in two bottles, $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ dose $\mathfrak{z}\mathfrak{i}$. drunking warm
beverage producing diaphoresis & diuretic - And much in favour
of it -

Acet. Col: sliced Col $\mathfrak{z}\mathfrak{i}$ dilut Acet Acid $\mathfrak{li}\mathfrak{j}$ proof Sp
 $\mathfrak{z}\mathfrak{j}$ - Dose $\mathfrak{z}\mathfrak{j}$ to $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ - Rf Mag gr xv Sulp

Mag $\mathfrak{z}\mathfrak{i}$ acet Col: $\mathfrak{z}\mathfrak{i}$ in water for a dose

Oxymerc &c

Powder - Sulp Acet Lead gr x Col gr xx Opium gr iij
Gum Arab q s divided in x pill one pill a dose for
active hemorrhage &c
Amman satd Spt of Col: Sulp Col: $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ to Spt Amman

Phases Feb 2nd

Digitalis or Fox Glove - leaves used to be gathered
about the time of flowering, comes tightly packed, preventing
light and damp, to be kept in tight bottle when in powder -
Not certain that it contains a narcotic principle, virtues also
by water &c - overdose produces dulness, pain in the forehead some
convulsion, nausea vomiting, debility &c - sometimes there is
effect sometimes suddenly.

Inf the best as a diuretic Dose ʒii

laminae -

Much recommended in Phthisis

Monday Feby 1st 1826

Belladonna, or Night shade - fruit a round berry of sweet taste the whole vegetable poisonous - leaves used of albumen alkaline salts &c - the medical properties on the alkaline part

Inf - grs 4 to ʒij water - Of the leaves powdered grs. dose has been used for poultices in ulcers

Ext - most common leaves fully sprinkled by water and evaporated dose grs - for the eye Hydrargyria, Tic doloreux &c May be a poison - Use sulphur Zinc & Copper as Antidote

Solanum Scrolosum Wogay right thoe - leaves of a green colour nervous tastes when fresh - stalks the part used to be gathered in the Spring - Yield Mallic acid from the berries -

Insoluble in Cold & Hot water - Alcohol dissolves a small quantity - Vomiting grs 4 - sleep also produced - good in dropsy Inf - as an aperient - stalks ʒj steep in water Boil in quart water, dose Has been used used the Belladonna

Hyoscyamus - humban - water ext - distilled alcohol the best - contains Resin -

active principle Hyoscyamine produces pupalins - coma, &c use the Cancer & Wascant also the Citric acid -

Ext - dose grs to ʒj - Tinct - ʒij to lly dose ʒp ʒij with Camphor produces sleep in Mania Ratu Camph grs - 14 grs grs is the dose - when opium contra indicated and also keeps the bowels open - Used also in Cataplasms - the smoke cures the toothache -

Platanus Stramonium - gymna weed - thorn apple - seed
good active - all the plant useful - contain quinine &c
dil: Alcohol - extracts the properties - It intoxicates very much
Inf

Tetanus, said to be produced by Stramonium

Good in nervous disease - as asthma Sic dolores, Epilepsy
Ext most frequent used dose 15-20 grs dose

dose grs of the ~~seed~~ ^{leaves}, seeds grs -

Smoking the leaves said to be good in asthma and is safe

Solidago Maculatum ^{common} Pycnanthemum - Henlock - the leaves have
an agreeable odour - leaves gathered while flowering

Activity improved by drying - dose $\frac{1}{4}$ leaves most active

Alcohol & water extract - Acid Antidote - used

externally for Schirrus and cancer with internal ~~ment~~

leaves dose pill grs iij or 3 each, the effects on the eyes may
be seen also on itching on the surface - the bowels will
be moved -

Ext - generally used and the best - but must have care in its
preparation

Not so much a narcotic good in the Lymphatic & nervous
system - good in Rheumatism even Syphilitic Rheu

matism if pushed it will allay pain certainly especially

in bones grs iij to X several times a day to be increased

Scrofula yields much to it - good very good in Asthma

Nux Vomica - best kind grs $\frac{1}{2}$ seed dose 4 or 5 grs powder ^(divided)

is of little use - is very bitter the active principle is ~~stramonium~~

Rhus Toxicodendron - Shoemack - leaves the only part used

Aconitum ^{Wolfbane} Abellum - the leaves employed - used ext. grs dose - leaves
5 to 10 grs

Cob. Web used frequently &c dose grs XXV to Vj to be kept
from light — Rj Tella aranea Zij Nit Potash Zij Syrup of
Mays for 20 pills one every one or two hours —

Thursday Aug 9th

Opium of the Poppy (white) paver laminiform, found in the
East — flows from incisions in the poppy — ~~is a resinous mass~~
in the Sun — Turkey is preferred to more compact lighter colour
containing 3 times more Morphinum than the East Indian
same by the watery or mucous by others —

Contains Gum, Resin

Solution of Nitrate of Silver & Mercury precipitate it —

Morphium made by

Contains carb: 72 Ashog: 5.50 Hyd: 5.50 Oxy 1
has all the character of an alkali — the Syrup the best form
of given Morphium — or $\frac{1}{2}$ or $\frac{1}{4}$ in substance in pills of Morph
Narcotin also contained in Opium,

acetic Acid will very much affect
the strength of Narcotine

Opium — Solution of Bayles produces a white precip: in East Indian
Opium used more in the Turkey
Land: Rj Opium Zij dial: Al: liij digest 7 days — never give
it without enquiring whether the patient is in the habit of taking it
— the longer it stands the stronger it will be, it should be clear &

Dr Rhces

Friday Feby 10th

Ann: Tinct. Opium ʒij Anise ʒss Alcohol

Rec: Opie R Opium 1 part Carb ʒss

Pills. Conu luti

Opie 1 part Parts: 8 Cochineal 1

Syrup - R Opium 18 grs Brit: Water ʒviij

Opium is said by Dr Rhces to be a stimulant &c

Antidote, first an emetic then bleed - Ammonia; Coffee, Acid,
very useful for the Stomach in small doses in pill for vomiting
Gastritis. Interictis large doses - Hypermene more so in combina-
tion with Calomel or clovers powdering

Good in Typhus - Gout, Rheumatism - Pneumonia
Asthma - Dropsy

It is the best Anodyne we are acquainted with even
from toothache to Tetanus -

Monday Feby 13th

Lactucaria - not very different from Opium
from the juice of the garden Lettice does the same as
Opium

Humulus Lupulus Hop - contains 25 different chemical
properties - the active exist in the Lupulus - is a small scaly
grain and about 1/5 of the Hop soluble in Alcohol & Water
- first clean it of sand by Water - dry without the sun -
given in Pulv Lup 1 Sagar 2 parts given in pills -
Infusion - and decoction Tincture - &c

Tinct: $\mathfrak{z}\text{i}$ to $\mathfrak{z}\text{ij}$ alcohol digest and add alcohol to
make $\mathfrak{z}\text{ij}$ — Extract- Lup: $\mathfrak{z}\text{iv}$ Water Gallan
Boil down — Sometimes slept on to induce sleep
It is a Narcotic the Tinct a tablespoonful & dose
Infusion ^{$\mathfrak{z}\text{r}$ to \mathfrak{vi}} a Wine glass full a dose good for drunkards —
It is an Anodyne Tonic. Diuretic - formerly thought to
be an Antispasmodic — Next Stimulants

Camp hor - a peculiar princip. of vegetable - in Cardamom
oil of sage, time - Sassafras - generally of Camphorous Laurels
& of the trunk & branches. in infusion after cut in slices
cleared by quick lime & — Specific gravity less than
water — Volatile in summer — Carbonic acid gas in
water dissolves Camphor — or Inturated with Magnesia
Solub: in Oils: Sulp Ether — Acetic acid best - not affected
by any substance — given in

Powder - by the addition of a drop or two of ~~al~~ alcohol or with
of Opium $\mathfrak{z}\text{ss}$ to $\mathfrak{z}\text{ss}$ — $\mathfrak{z}\text{ss}$ Nitrate Pot $\mathfrak{z}\text{i}$ Camph
 $\mathfrak{z}\text{ss}$ $\mathfrak{z}\text{ss}$ Tact Ant $\mathfrak{z}\text{ss}$ divide in 8 part for a hard
fine pulv — $\mathfrak{R}\mathfrak{f}$ Camp $\mathfrak{z}\text{ss}$ Opium $\mathfrak{z}\text{ss}$ form
a good pulv — for an Anodyne $\mathfrak{R}\mathfrak{f}$ Tact Ant $\mathfrak{z}\text{ss}$
Opium 6 $\mathfrak{z}\text{ss}$ Camp $\mathfrak{z}\text{ss}$ 36. Oil Roses divide 12 full
In Mixture add sugar and 3 times its weight of Gum
Arabic — Camphorated Emulgent $\mathfrak{R}\mathfrak{f}$ Camp $\mathfrak{z}\text{ss}$
Sweet Alm olds $\mathfrak{z}\text{ss}$ Sugar $\mathfrak{z}\text{i}$ Water $\mathfrak{z}\text{vi}$ Rose
a Tablespoonful Or $\mathfrak{R}\mathfrak{f}$ Camp $\mathfrak{z}\text{i}$ Magnolia $\mathfrak{z}\text{ss}$
Sugar $\mathfrak{z}\text{ss}$ Water $\mathfrak{z}\text{iv}$ or Camp $\mathfrak{z}\text{ss}$ $\mathfrak{z}\text{ss}$ $\mathfrak{z}\text{ss}$
Water $\mathfrak{z}\text{vii}$ dose a Tablespoonful add Simp Simp

Lint Zi to lii alcohol generally used externally
if too largely given pain in the fauces, itching, thirst, vomiting
de Opium the best Antidote — An Narcotic by Dr. Ede
some say stimulant — the only effect the pulse to fulness
very useful internally in many diseases — by this manner used externally
Ol: Camph — Camph 1 part Oil Olive 4 parts —

Hard Soap 3 parts Camph 1 Spt Rosmary 16
Given internally in Typhus fever with an affection of the Lungs
with — this also Camph Mix 3N Spt Ming: —
Dose a table spoonful — for Stimulants & diaphoretic
good in Exanthematous — Epilepsy —

~~Bathe with~~ Oil Catypur — Oil obtained of the
leaves and of a green colour Dose 3 to 10 qts on sugar
and used when camphor is denuded — Also diuretic
maybe depended on for toothache — often adulterated

Ol: Terebinth. does not irritate the mouth and fauces as
on the skin dissolved in Alcohol & Ether
to 8 part Oil add Alcohol & agitate for some time and
the oil becomes pure & tasteless — Emulgent & de
as Camphor with milk, water or any thing else
as a stimulant 30 qts the same for Diuretics —
if larger — Bathing & Vermifuge

Bals: Turpentine or Harlan — Sweet Guaiacum
Camphor, Ol: Turpentine —
Dose 30 qts — Dr Chapman gives it in vom-
iting in yellow fever but of no use & de

Serehinchi

Thursday Feb 7

Composed of Resin and Oil better in proportion to the
Oil make a lip — good a purge sometimes in Gout

Benice Larvus thicker than Oil thinner than Honey

Venetian Turpentine, a diuretic very powerful - a spruce
beer

Ter: Vulgaris ^{Pinus silvestris} more coarse & dense, more in common
the use than the other

Tar Empyren: Oil Resin + acid Salts - decomposed by
water partially vapour &c in Pulmonary -
add a 3j of alkali to 1lj then set over the lamp - no
doubt it does good - internally as a tonic in Typhus
also for weak stomach of children

Burgundy Tar - fumes do not destroy the contagion

Tar & Tar aa for Ointment - good Erysipelatous

Burgundy Pitch - make an incision ^{in the tree} Boil strain, a
antiseptic - no odor

Serehinchi,

contains Benzoic acid

Ter: canadensis - Bals of Canada - like Bals of Oil of

give in pill with Symplic - dose 4 gr: 3x

Rheco Thursday Feby [1826 Feb. 16]
Bals Capaiva - found in Brazil - pale yellow colour
insol. water solub. 10 parts Alcohol & Oils -

not so stimulant as diuretic - in great doses affects the
brain - ~~see~~ Dr Chapman generally commences with the
Capaiva immediately above 40 grs 3 times a day not to purge

R Balsam Cap: 3p Nitri: 3p Spt. Lav. Comp: 3ij
Lana: 3i G. Arab 3ij Water 3liij -

or R Capaiv: Nitri: 3p - white of an egg Lana: 3i
Sugar 3i Water 3liij two table spoonful in a day
this the prescription of Dr Chapman for gonorrhoea
Good in pulmonary disease allaying cough & exciting
expectoration
Friday - Feby

Peruvian Balsam - reddish brown Resin Oil Ben Acid
water dissolves Ben. acid, Alcohol - dose ʒi to 3i in pills

Bals. Tolu - milky solution Tinct. Comp Tinct Benzoin

Sugar 3viii or ʒi
good in affections of the lungs

Benzoin - Amygdin - from Linnæa - yellow frag-
ments give out Benzoin acid - should be dissolved by heat
may be extracted from the urine of children - in water solution
in the Linnæa leaf - its odour is its chief -

* Lymnocarpus fastida - stink cabbage - roots & seed, leaves for asthma, catarrh of
abdominal muscles - loses much by drying - Ext. R dose ʒp to 3j, Ext 2 to 5 grs.

Resin Guaiacum - Wood & Gum - Tree of America

Wood heavier than water - Yields after long decoction - Good sweating
fornicately for Syphilis - they are a warm stimulant
greenish brown - becomes green in powder
Water depolue 9. Alcohol 95. Sulf acid depolue st
nitric acid - acid incompatible - given in bolus ʒss ʒss
with ʒ arab -

Gum ʒij to ʒijss for chronic
Rheumatism & gout, dose ʒss ʒi - Gum Gu ʒiv

Am: Alcoh ʒijss - Add Al: Sassafras - Pul
Comp: Mix. Benz. ʒi: Guaiac: ʒijss Sug ʒijss Am ʒss ʒij
Sim: water ʒviij Dose table spoonful - also in pills
A Stimulant.

Cubaba - Cubebis - Like Copaira & Terebinth - Tree Java grain
like pepper - Vol Oil - Resin - Vol Resin Resin like Co-
pairo contains the active principle of Spt

the Rhanismus catharticus often used for it

Dose ʒss and larger to Cathartic ʒi. Said to be good
in gonorrhoea when given to purge even to an ʒij in
12 hours - Dose ʒijss to ʒij Spt of wine
Dose ʒii or ʒij no use in gonorrhoea

Red pepper ^{Capicum} - native of E & W Indies a good stimulant
good in low state fever inter: ext: also in gargle for sore
throat - Ether & Spt ext the pod. of Mucil

Inf of Gum acetate - in pill with ~~with~~ bread 6 to 10 grs
is often adulterated with red lead - Sulf acid gives a dark
precip -

Black pepper - useful as tonic & dose 5 to 8 berries

Ginger &c aromatic - good in effusion -
Saturday

Stimulants &c - those of which we have spoken might nearly
all be placed under this class or at least few can be left out

Ammonia - Carb. & Murate, - Carb. bol alkali - Soluble
in 2 or 4 times its weight in water - more soluble in warm water - insoluble
by alcohol - ^{than generally used} Incompatible - acids - magn. Lead Iron Zinc
should be volatiles by heat -

Dose .x. xx grs in pill alone or in combination with Opium &c

Rf Carb Amm. Zij Sug 4 Ac aa Zj Cinamon water Zij
water Zij - Dose 1 table spoonful every hour as a stimulant

4 Carb Amm 3j Ment water 3j Syr Orange 3j - 1/2 is a
dose - Water of Ammonia mur: 4 Mur Am 6 Potas

3XV Water 4ij Mixing and adding Dose 3j to 3i

Acetate of am: Spt: Minguier - Acetate of Lead produces a
precipitate also magnesia - * Is a diaphoretic and very useful
Dose 3j to 3j every hour or so - Carb Amm: 3j to 4ij water
very pleasant &c -

Muriate of Ammonia - principally as external remedy as a discutient
for Pulmonary sweat Soap 3j Lead Plast: Zij when nearly cold add 3j
powder Amm. mur: should be removed every 24 hours -

Agua Ammonia Rf Mur. Amm: 4j Lime 4ij water 4vj
Dose 20 or 30 gts as often repeated -

4 aq Am Carb mag 2a 3j Lin water Zij water 3vj
a table spoonful a dose

Phosphorus - giving solution in bitrol & ether Dose grj - 4j
extreme caution in giving it - Gutta Serena - used in flatulencies

* Gum ammonia - of 2 kinds - taste sweet - Gum Resin - soluble in water vinegar, Spt &c
triturated in water, a milky solution - given in pills with Camph Dose .x to 30 grs
amm: 3j to 4ij water -

Alcohol — Wine — Ardent Spirits & Malt Liqueur — the chief &c
Malt Liqueur — is Tonic & stimulant the best is Porter — in low Typhus
 and all convalescence we might ^{give} it in union with bark, Opium &c
Ardent Spirits — is useful — in low Typhus fever — we might substitute
 The Lisbon & Madeira Wine, the best Wine Whey — 1 part Wine 2
 of milk — " — this ~~causes~~ closes stimulants

Antispasmodic Monday Feb 20

Ether Sulphureus - or bitroil ether ^{aa} - adding Zij of Potash
very inflammable - Count of Oxy Hydro Carb - requires
16 parts to decompose no power over the fixed alkali - does Zijt Zijj
produces thep - Hoofman &c given with - in Hoop-
ing Cough Asthma &c - very useful in vapour (the Mudge)
reduces the heat of a part by to as in hernia * also Valerian
Valerianus officinalis - dry elevations the herb - dug up in August - & Sept. 9 Recm
&c - Soluble in boiling water, Alcohol - Horse paw 3p to Zij - Tinct Zijj & pt Zij
Leve Zij or 3 - anem: Tinct does the same more powerful - Inf Zij root 3vij Leve
3ij
pt Nitrous Ether but 4pt ether - Alcohol Orij Nitrous

acid liq — no unpleasant soluble in water & alcohol
Iron a yellow colour, of no use as a stimulant — Dose \times to $\times \times \times$ gts
produces the febrifuge agents —

Oil Succini - by distillation from glutin. alone x to 30 yls
with cast am: shaken together to white colour

Musk & Castor - resemble the deer or fawn long - bag about 3 inches long
in round then bladder, in grains dry brown peculiar odour - and arguments
other odours - taste bitter thin mucilaginous matter - boiling
water dissolves - Sulfur better the best - decomposed Ox: Mucosa
grain 6 to 30 grs. - Must 3ij Lix 7i q. ch 3ij water 3vj
dose a table spoonful - Nit. acid 3p - Anim. Oil 3ij add rectified
Spt - Castor - Bear - not the testes - there are 4 bags dried in smoke - held
hold oil 2 - exp. by water alcohol. Spt - Spt - gaman very good with - Russian the best
Zinc 3j to 4j dose 5j to 3ij - Dose 1 to 2 - good in enema, attracts dogs &

Rhees-

Feb 21st Tuesday

^{Terula}
Asafoetida — of two kinds — Lasa &c — we know not which one
belongs to — Lat white milky juice — the root about 4 years
juice exposed to the sun and hardened colour — Odour
contains Gum 10 Resin Oil 10 — yellow to alcohol
milky mixt. to water — R^e Asaf ʒi to white of an egg
or triturated with something may be permanent Plas ʒvj
Camphor ʒp — Mixt. & Pill Horie 5 grs ʒi

R^y Apaf- Zij two Egg - water Zij Syrup Zi
Dose one or two table spoonful - Lac Apaf - much in whooping
cough - readily taken by children -

Galbanum - Gum Resin Guben - plant native of Africa flower yellow
Resin obtained from the stalks just above the root - that of stalks &
seed good for according to white Tars - odour & taste peculiar.
Contains Resin Vol: Oil - Water Wine vinegar take $\frac{1}{4}$ of it
in white mixture - may be suspended by G^r & Sybic -
2 part Lpt: 1 water dipoleve all - distillation gives Oil
leaves Zj to Zi - Tinct

The last of Antispasmodics -

Tonics

Peruvian barks - Chincona - of the trees we know nothing
known 1640 - there are several varieties. no difference between the
yellow and red - the pale only a variety - has been found the size
of a mans body - bark taken in Sept - and dried in the sun
Wednesday

The odour and taste are the same of all the three kinds -

Lanceifolia - Pale Bark - contains a peculiar Quinine acid is con-
tained - green matter, stannous, lime. &c - Boil in Alcohol until
it bove it better - evaporate add Magnesia -
wash - dry - Wash in Alcohol &c the process of Quinine
Sulphate - Soluble in Water -

Coratifolia Yellow Bark - contains Quinine - cannot be crys-
talized - soluble in ether - more bitter - insoluble in water &c
are the difference from Cinchonine - the Sulp^r of Quinine
generally used - Boil Lijj half an hour in 16 pints water
Sulp Acid Zij - strain &c - and add lime gradually Lijj -
when brown precipitate - digest
yeld 5 to 6 Z of Sulp Quinine

Water dissolves it Dose 1 gr with ʒ of water

Longifolia Red bark - gives Cinchonine & Quinine in larger quantities than either of the others - And if good is the best yellow maybe preferred - Some prefer it in Powder bark indicated as well as other Tonics for debility generally good in the Paroxysm of Int. fever - Which is a relaxed state! It aggravate Hepatic diseases, also nervous diseases -

Quinine Soluble - in warm water better than in cold - Quinine also has become sour - Decoct: extract much not more than 10 or 15 minutes or it undergoes a chemical change. less soluble in vinegar - Lime water dissolves it well for Children - good Interalia with Magnesia - Alcohol dissolves in Tinct -

It is given in powder the best ʒj ʒij - or Inf or decoct: Inf ʒij more also decoct - ʒss to ʒ pint two hour for maceration in Inf -

Ext. 1 Water 1 gal: Boil to 6 pint & strain Dose 2 to 4 grs in pills -

Tinct. Bark ʒiv alloch: Strip core ʒij

Huck come Tinct - Bark ʒij - Orange ʒss

Lime ʒij Inf ʒij bochine ʒij Opt ʒxx - Macerate 14 days - Friday Feb 24th

~~Serpentaria~~ Serpentaria Astralagia - of Resin & Oil, water

And Opt Inf ʒiv water ʒxij Dose ʒibij Decot

Tinct Dose ʒi to ʒss -

very useful indeed -

Polygala Senega — Dose ℥j to ℥ss — make root —
the active principle in the bark of the root — Water & spt
extract is virtues — not much of an emenagogue.
Inf — Emetic ℥ss with squills sometimes produce Ptyalism.

Lutea, gentiana — root — Contains Resin, Oil, Tannin
and an Alkaline principle ^{gentianum is yellow} — of Green Tinct: is very bitter
Water & Alcohol & spt ext — Tinct, Wine Infusion
Dose ℥j to powder Inf ℥ss to ℥iv — for a dose — very similar
to Senega —

Columbo — contains Cinnamon. Resin, Oil &c
Water Boiling takes $\frac{1}{3}$ — spt the best — a precipitate by
galls — &c — Root Dose ℥j ℥ss in powder
Inf ℥ss —

American Columbo — some think equal to the former. Root —
Water the best solvent — Inf generally given —

Logwood — Cornus succinatus &c of 3 kinds. might be used
~~or~~ Chincow — bark — of Tannin Resin &c
Dose 5 to 10 grs — Ext &c also used —

Swamp Sassafras — the bark — a good Tinct — & Infusion.
Monday Feby 27th

Quapia — of 2 kinds root bark & wood — ℥ss to $\frac{1}{2}$ pint
Water Inf — good for better

Flour of Camomile — of Oil Resin, bitter, taken up by
Water & Alcohol — diaphoretic — a mild Emetic

Rhee. Feb 27th

Euacatorium Perfoliatum. - Bone set, thorough wort - gives
Gallic extract, resin, Gallic acid - taste bitter - give up to
water - sometimes emetic - very good as a diaphoretic
Cold Infus: $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ prove tonic.

Geranium Maculatum. of Tannin - Opt. water.

$\mathfrak{z}\mathfrak{i}$ to $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ - a table spoonful Tinct dose $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ - x gr
of Ext. - $\mathfrak{d}\mathfrak{j}$ of powder -

Astringents - Oaks all contain tannin - dose $\mathfrak{z}\mathfrak{i}$ $\mathfrak{z}\mathfrak{j}$
in powder - also of Galls is very stimulant dose
5, to 10, to 15, grs in powder - Black berry

Kino - an Ext. dose $\mathfrak{z}\mathfrak{i}$ to $\mathfrak{z}\mathfrak{j}$ - dose Tinct. $\mathfrak{z}\mathfrak{i}$ to $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ of
 $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ to $\mathfrak{l}\mathfrak{l}\mathfrak{j}$ - ~~Tinct~~ Kino. Chalk. \mathfrak{q} $\mathfrak{A}\mathfrak{r}$: Sug aa $\mathfrak{z}\mathfrak{i}\mathfrak{j}$
add water $\mathfrak{z}\mathfrak{i}\mathfrak{v}$ Tinct Kino & bark^{aa} $\mathfrak{z}\mathfrak{j}$ - dose a
table-spoonful -

Catechu - - - dose $\mathfrak{z}\mathfrak{i}$ to $\mathfrak{z}\mathfrak{j}$ - Inf. Cat. $\mathfrak{z}\mathfrak{i}\mathfrak{v}$

Iron filings dose 5 grs $\mathfrak{z}\mathfrak{j}$ as an Electuary, Rust of Iron $\mathfrak{z}\mathfrak{j}$ $\mathfrak{z}\mathfrak{i}$.

Sulp-Iron 2 to 6 grs called Copperas - Ann: Iron 10. 12 grs -

Mur Tinct Iron 10, 20 gtt - Ann: Copper $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ - \mathfrak{q}

Flour Zinc - 1 to 6. 20 grs - Ox Bism 3. 10 grs
Sublimate of Silver $\frac{1}{4}$ gr - Mur Gold $\frac{1}{5}$ gr - Arsenic

Dr. Rheese.
